I. HIGHLIGHTS

a) Major Economic Developments

* New Hampshire's economy is improving slightly as the number of people who are unemployed has been going down since January 1983.

* There will be slight increases in population growth statewide with the most active growth occurring in Hillsborough and Rockingham counties.

* Total population is expected to expand by 73,470 or 8.0 percent over the 1980 census, projected to 994,080 for FY 1984.

* The civilian labor force will continue expanding with the greatest expansion in Hillsborough and Rockingham counties.

* The civilian labor force is projected to reach 519,681 in FY 1984, a gain of about 3.5 percent from the latest anticipated FY 83 data.

* Unemployment rates are expected to average about 6.9 percent for FY 1984. Coos and Sullivan counties are expected to be the highest with 10.8 and 8.8 percent unemployment rates respectively.

* The total number of individuals who will actually incur a period of unemployment in FY 1984 is projected to reach 112,040. The average number of long-term unemployed (15 weeks or more) persons are expected to increase by approximately 2,980 to 10,230 for FY 1984.

* The number of economically disadvantaged will rise 2,270 to 96,080 a 2.4 percent rise over the projected poor for FY 1983.

* Manpower services will be needed by persons lacking in employable skills, laid off due to industry wide closings who will require retraining in order to become employed, lack of work experience or educational requirements. These problems can be further hindered by geographic and transportation problems. In some areas employment is of a seasonal nature, as in the northern part of the state where some workers are required to have two skills in order to be gainfully employed throughout the year.

II. Description of Area

The State of New Hampshire is one of six New England States in the Northeastern part of the United States. Under CETA in FY 1983 there were two CETA Prime Sponsors in the State with Hillsborough County as one Prime Sponsor and the remaining nine counties compromising the Balance of State as the other Prime Sponsor and are administered by the New Hampshire Office of Employment and Training. Beginning in FY 1984 there will only be one service delivery area the State of New Hampshire as designated by the Governor.

New Hampshire shares its boundaries with the Province of Quebec to the north, the Connecticut River and the State of Vermont to the west, the State of Massachusetts to the south and the State of Maine and the Atlantic Ocean to the east. The State has seventeen miles of coastline along the Atlantic Ocean.

The average elevation in New Hampshire is 2,000 feet and approximately 84 percent of its 9,241 square miles is covered by forests. The southern section of the State consisting of Hillsborough, Merrimack, Rockingham and Strafford counties contains over seventy percent of the State's population.

The mountains in the north, the seacoast in the east and the many lakes and ponds through the State are all within easy reach from Concord, the State's capital. Concord is readily accessible from various Northeast major cities. Listed below are highway distances:

From:	To Concord:
Boston	70 miles
Montreal	240 miles
New Haven	174 miles
New York	250 miles
Portland	87 miles
Providence	110 miles

a) Economic Trends

The economic climate in New Hampshire is beginning to stabilize. Table 63 illustrates this point with the per capita personal income averaging out at only one-tenth of a percentage point behind the national and New England Average. New Hampshire rose to a ranking of fourth place in New England after being fifth last year.

Total personal income for New Hampshire was higher than the national or New England averages, although the state's average dropped by two-tenths of a percentage point from last year. Table 64 shows this as well as the fact that New Hampshire is again ranked number one in percentage change from 1980 to 1981 12.0 percent for total personal income in New England.

The following tablulation of total wages serves to show the changing pattern in the share of industry between manufacturing and non-

manufacturing. The year averages for 1971 - 1975 show a decline in manufacturing, while the year averages for 1976 - 1980 show a fluctuation around 42 percent for manfacturing. The year 1981 shows another decline of approximately nine-tenths of a percent. Third quarter figures for 1982 show another decline to 39 percent for manufacturing.

Total Wages
New Hampshire
(Workers Covered by Unemployment
Compensation in Private Industry)

Year	Total	Manufacturing	Non-Manufacturing	Percent of Total Mfg.	Non-Mfg.
1971	$1,240,100,000	608,690,000	631,410,000	49.0	51.9
1972	1,543,947,639	682,756,348	861,191,291	44.2	55.8
1973	1,764,794,646	764,904,559	999,890,087	43.3	56.7
1974	1,912,311,974	815,835,934	1,096,476,040	42.7	57.3
1975	1,959,164,661	801,425,796	1,157,738,865	40.9	59.1
1976	2,260,558,803	950,208,803	1,310,350,000	42.0	58.0
1977	2,587,126,913	1,096,181,639	1,490,945,274	42.4	57.6
1978	3,041,007,264	1,281,209,453	1,759,797,804	42.1	57.9
1979	3,537,373,910	1,496,782,374	2,040,591,536	42.3	57.7
1980	3,957,283,436	1,684,829,094	2,272,454,342	42.6	57.4
1981	4,432,106,831	1,848,281,022	2,583,825,809	41.7	58.3

III. Labor Force and Population Demographics (Tables 1,2,3,4,5,6)

Population in New Hampshire is expected to reach 994,080 during Fiscal Year 1984.

During the ten year period between the 1970 and 1980 census years population increased an average of 2.5 percent annually. The annual gain from the 1980 census to FY 1984 is about 2.0 percent.

The males share of the population rose one-tenth of a percentage point to 48.5 percent while the females share dropped one-tenth of a percentage point to 51.5 percent when compared to the same percentages for FY 1983.

Those individuals 65 years and older total 120,378 representing 12.1 percent of the population in 1984.

Table 3, "Population Characteristics by Age, Sex and Racial Status" for the state shows the largest age group to be the 20-34 year olds with a total of 256,877. This represents 25.8 percent of the population, which is a minor drop from last year's figure of 26.0 percent.

The civilian labor force is expected to reach 519,681 in FY 1984, an increase of about 17,560 workers over the 1983 figure and a 14.5 percent increase over the 1980 census labor force. From 1980 the female civilian labor force increased by 23.4 percent to 243,066 while the male labor force increased 7.7 percent to 276,615. The age group 25-34 year olds is expected to have the largest percentage of the labor force with 27.7 percent of the

total. The labor force participation rate rose four-tenths of a percentage point to 68.0 percent over 1983 figure, while the male participation rate fell nine-tenths of a percentage point. The female influx into the labor force increased the participation rate by 1.5 percent.

More job opportunities coninue to be available for the female workers as they have been for the past decade. More employer flexibility for hours and benefits are some factors for the increased participation rates for females.

IV. Industrial Employment (Tables 8 through 39)

Annual average of nonagricultural employment reached 397,600 in 1982, a drop of 950 from 1981. The goods producing industries fell 2.0 percentage points of the total nonagricultural wage and salary employment from 1979. Manufacturing lost 2.2 percentage while construction and mining gained two-tenths of a percentage point due to the continued construction of a large nuclear power plant in the state. The service producing industries recorded employment gains in all industries except government. Services accounted for the largest increase with 1.7 percentage points over 1979.

Changes in industry percentages followed a similar trend when comparing New Hampshire figures with those of the United States.

The following table shows the relationship of New Hampshire with the United States and the other New England States in January 1983:

Employees on Nonagricultural and Manufacturing Payrolls by area (in thousands)

Area	Total Nonagricultural	Manufacturing	Percent of total
United States	87696.0	17995.0	20.5
New England	5314.9	1378.3	25.9
Connecticut	1405.7	403.6	28.7
Maine	397.4	104.7	26.3
Massachusetts	2546.2	599.7	23.6
New Hampshire	382.5	109.0	28.5
Rhode Island	383.4	114.0	29.7
Vermont	199.7	47.3	23.7

Source: U.S. Department of Labor, Office of Information, Boston Massachusetts, Bureau of Labor Statistics, New England Employment and Unemployment, January 1983.

New Hampshire's manufacturing percentage of the total nonagricultural workers as of January 1983 was above the nationwide and New England percentages. In New England, Rhode Island leads with 29.7 percent followed by Connecticut with 28.7 percent. New Hampshire is third as it was last year, with 28.5 percent. All percentages reflect slight declines from the previous year and reflects a shift of greater proportion of employment to nonmanufacturing industries. The period 1970-1982, shows the following:

PERCENT

Manufacturing to Nonagricultural Employment

Area	1970	1975	1980	1982
U.S.	27.3	23.7	22.1	18.5
N.E.	27.2	27.2	27.8	26.4
N.H.	35.4	28.3	29.8	28.5

New Hampshire is maintaining a greater proportion of manufacturing than the New England States as a whole.

The following table shows the relationship of New Hampshire with the United States and the other New England States according to durable and nondurable goods in January 1983:

Employment on Durable and Nondurable Manufacturing Payrolls by State
(in thousands)

Area	Durable Goods	Nondurable Goods
United States	10476.0	7519.0
New England	851.3	527.0
Connecticut	292.4	111.2
Maine	38.1	66.6
Massachusetts	367.9	231.8
New Hampshire	68.0	41.0
Rhode Island	51.5	62.5
Vermont	33.4	13.9

Source: U.S. Department of Labor, Office of Information, Boston, Massachusetts, Bureau of Labor Statistics. New England Employment and Unemployment, January 1983

Durable goods accounted for the majority of the manufacturing industries in New England. Maine and Rhode Island were the only states where durable goods were less than fifty percent of manufacturing. New Hampshire with 62.4 percent of manufacturing in durable goods was third in New England preceded by Connecticut and Vermont.

Machinery with 23,400 workers is the leading industry in manufacturing in New Hampshire followed by electrical products with 19,800 workers. In 1982 durable goods with 72,650 workers had 64.8 percent whereas nondurable goods with 39,400 workers had 35.2 percent of all manufacturing (see table 9).

Comparative growth of manufacturing employment in New Hampshire and the United States is illustrated by the following table:

Growth in Manfacturing Industries
New Hampshire and the United States
(In Thousands)

	New Hampshire		United States*	
Year	Average Employment	Percent Change	Average Employment	Percent Change
1971	86.3	-6.5	18,623	-4.0
1972	90.8	5.2	19,151	2.8
1973	96.0	5.7	20,154	5.2
1974	94.2	-1.9	20,077	-0.4
1975	85.1	-10.7	18,323	-9.6
1976	94.5	11.0	18,997	3.7
1977	101.4	7.3	19,682	3.6
1978	109.8	8.3	20,505	4.2
1979	116.0	5.6	21,040	2.6
1980	116.6	.5	20,285	3.6
1981	116.4	-.2	20,173	-.6
1982	112.0	-3.8	18,848	-6.6

*Source - Employment and Earnings, May 1983 Vo. 30 No. 5

The overall growth in the manufacturing industries for the period 1970-1982 shows New Hampshire increasing at a rate nearly six times the national rate (26.8 to 4.6 percent). An examination of the year by year rates of change reveals the nationwide rates have had the tendencies to lesser fluctuations than the State. The employment declines during 1971 and the recession of 1974-1975 were each considerably steeper statewide than nationwide while the recovery periods following proved to be much more intense.

Growth in trade and services, as shown in the following table, also accentuates the proportionately greater expansion statewide. The overall growth in New Hampshire for the decade of the 1970's was 74.3 percent, more than one third higher than the nationwide rate of 48.0 percent. Only during the recession year of 1975, and in 1980, did the State and the Nation show virtually the same rate of change.

Growth in Trade and Services
New Hampshire and the United States
(in thousands)

Year	New Hampshire Average Employment	New Hampshire Percent Change	United States* Average Employment	United States* Percent Change
1971	99.1	4.2	27,149	2.1
1972	105.9	6.9	28,225	4.0
1973	114.6	8.2	29,471	4.4
1974	117.8	2.8	30,428	3.2
1975	120.3	2.1	30,952	1.7
1976	127.1	5.7	32,306	4.4
1977	136.0	7.0	33.819	4.7
1978	145.5	7.0	35,794	5.8
1979	153.1	5.2	37,305	4.2
1980	157.9	3.1	38.286	2.6
1981	165.8	5.0	39,336	2.7
1982	166.8	0.6	39,552	0.6

*Source: Employment and Earnings May 1983 Vol. 30, No. 5

V. Employment Information by Occupation (Tables 46,65,66)

Sales workers are projected to have the largest annual growth rate with 4.7 percent followed by Service workers with a rate of 4.3 over the period 1981-1991. The average rate of growth for all workers is 3.8 percent. The lowest growth rate is 3.0 percent which is found among the laborers and unskilled workers.

The following table shows the nineteen occupations that have a growth rate of 6.0 percent or better which is considerably higher than the average of 3.7 percent.

Occupations with Annual Growth Rates of
6.0 percent or Better

Peripheral Equipment EDP Operators	8.2
Coil Finishers	8.1
Electrical/Electronic Assemblers	7.3
Investigators, Insurance	7.2
Coil Winders	7.1
Child Care Attendants	7.1
Plater Helpers	7.0
Sales Agents, Insurance	7.0
Electrical/Electronics Technicians	6.9
Electroplaters	6.7
Child Care Workers	6.7
Social Service Sides	6.5
Data Processing Machine Repairers	6.5
Worksheet Clerks	6.4
Testers	6.2
Mechanics, Aircraft	6.1
Dieticians/Nutritionists	6.0
Proof Machine Operators	6.0
Survey Workers	6.0

Note: Restricted to occupations with employment of 100 or more in 1981.

The fifteen specific occupations offering the greatest number of annual job openings by growth are listed below by order of rank:

Fifteen Occupations Projected to Have the Greatest Numerical Growth

Occupation	Annual Growth
Sales Clerks	531
Sales Representatives, Agents or Associates	485
Electrical/Electronic Assemblers	483
Waiters/Waitresses	474
Secretaries	382
Cashiers	372
General Clerks, Office	363
Nurses, Professional	293
Managers, Store	237
Nurses Aides/ Orderlies	222
Food Preparation and Service Workers, Fast Food	215
Electrical & Electronic Technicians	210
Kitchen Helpers	193
Supervisors, Nonworking (ex. services)	188
Truck Drivers, Heavy	177

VI. Unemployment Information

a) Trends in Unemployment (Tables 6,7, 47-59)

Annual average unemployment for the state in 1982 was 36,000 with an unemployment rate of 7.4 percent. Projected unemployment for FY 1984 is 35,974 with an unemployment rate of 6.9 percent. This would indicate that the economy will stabilize somewhat at the 1982 levels of unemployment after the increase in unemployment that occurred in the first part of 1983.

Table 7 represents another view of the projected unemployment. An estimated 112,040 individuals will experience unemployment at some point during the year.

Of the 112,040 unemployed workers, males will account for 52.0 percent and females will account for the remainder of 48 percent. The number of long-term unemployed is projected to reach 10,230, an increase of 2,980 over FY 1983 with males accounting for 56.3 percent.

New Hampshire exhaustees in the first quarter of 1983 (Table 59) totaled 2,748 with 1,738 on 63.2 percent male. Hillsborough, Rockingham, Strafford, and Sullivan Counties account for fifty-two percent of the exhaustees in the first quarter of 1983.

Approximately thirty percent of the exhaustees received weekly benefits of $120 or more. Tables 46-57 shows the breakdown by state and counties.

b) Insured Unemployed (tables 60-62)

The data on insured unemployment are based on information as of March 1983.

The total insured unemployed in the state rose to 11,623 of which 3,273 or 28.2 percent were female. Goods producing industries accounted for 65.0 percent with service producing industries accounting for the balance or 35.0 percent. Comparing the male-female percentage in the goods producing industries in the goods producing industries with the service producing industries, shows male predominance rose by three percent to 78 percent in the former while their predominance fell by one percent to 60 percent in the latter.

Table 61 shows that by major occupational classification, structural at 28.9 percent, clerical at 12.3 percent, and benchwork at 10.6 percent made up for approximately 52 percent of all insured unemployed in March 1983. Seasonal layoffs of construction workers results in a higher proportion of workers from this industry division in the winter months.

The age group of 25-35 year olds has 4,092 insured unemployed which is approximately 35 percent of the total. More than half of the individuals fall into the 5-14 week category according to weeks of current employment.

c) Employment Service Job Openings

A total of 11,798 job openings were received by the New Hampshire Job Service during the first six months of Fiscal Year 1983. During this period the Employment Service Section of the Department of Employment Security successfully placed 7,316 applicants with a placement ratio of 62.0 percent. Approximately 57 percent of job openings received were in clerical, services and structural occupations. Fishing, farm, forestry and services placement ratios were the highest while professional, technical and managerial applicants were the most difficult to place with a placement ratio of 34.1 percent.

New Hampshire Job Openings
Received and Filled

October 1, 1982 - March 31, 1983

Occupational Category	Openings Received	Openings Filled	Percent Filled
Professional,Technical,Managerial	841	287	34.1
Clercial	2,448	1,391	56.8
Sales	896	497	55.5
Services (including domestics)	2,223	1,558	70.1
Fish,Farm, Forestry	249	221	88.8
Processing	165	107	64.8
Machine Trades	1,048	605	57.7
Benchwork	734	459	62.5
Structural	2,081	1,391	66.8
Miscellaneous	1,113	800	71.9
Total	11,798	7,316	62.0

Source: ESARS Table A07

The following table shows the relationship between Active Applicants and Openings Available as of June 30, 1983 in New Hampshire. The overall Applicants per opening rose slightly in the past 13 months from 4.0 to 4.4. Professional, technical and managerial had the highest applicant per opening ratio with 13.4. Services had the lowest ratio with 2.0 applicants per opening.

Occupational Group	Active Applicants	Available Openings	Applicants Per Opening
Professional,Technical,Managerial	2,125	159	13.4
Clerical	2,681	521	5.1
Sales	841	204	4.1
Services (Inc. domestics)	2,136	1091	2.0
Fish,Farm,Forestry	273	81	3.4
Processing	435	88	4.9
Machine Trades	1,647	258	6.4
Benchwork	1,296	224	5.8
Structural	2,568	524	4.9
Miscellaneous	1,493	352	4.2
Total	15.495	3506	4.4

Source: ESARS Table A07

VII. Estimates of Needs for Manpower Services (Tables 7, 40-44)

Manpower services will be of prime importance to unemployed workers, especially the long term or hard core unemployed individuals, those employed part-time for economic reasons, the youth group and the poor or economically disadvantaged.

It is estimated that 112,040 individuals will be unemployed at sometime during Fiscal Year 1984 of which 10,230 will be unemployed for fifteen weeks or more. Many of these individuals will require help in securing employment, help in retraining for a different skill in order to rejoin the labor market. Females make up 48.0 percent of the total unemployed but only 43.7 percent of the long-term unemployed. These figures are up slightly when compared to last year.

Manpower services will be needed by the economically disadvantaged to help alleviate their generally depressed circumstances. There will be an estimated 96,060 poor persons during FY 1984, an increase of 2,270 over the previous fiscal year. Individuals less than 18 years old account for approximately 30 percent of the total population of the state but their share of the "poor" population is 45.2 percent. Persons receiving welfare assistance declined by 2,528 or 7.3 percent over the prior year.

Persons employed part-time for economic reasons are another group that needs special attention. Some of the cause for individuals working on a part-time basis are material shortages, slack work, the inability to find full time work and lack of transportation to be able to enlarge their job hunting geographical area. Females comprise 48.4 percent of the total employed while their share of the part-time employed rises to 58.7 percent due to the fact that there are more part-time jobs for females than males.

The youth group is usually considered to be the one most in need of manpower services. The following table shows the employment, unemployment and the unemployment rate of the 16-21 year olds that make up the youth group.

New Hampshire Employment and Unemployment
For Youth 16-21 Year Olds
April 1983

Area	Labor Force	Employment	Estimated Unemployment	Unemployment Rate
New Hampshire	66,995	61,103	5,892	8.8
Belknap	2,503	2,239	264	10.5
Carroll	1,484	1,247	237	16.0
Cheshire	3,831	3,508	323	8.4
Coos	2,202	1,690	512	23.3
Grafton	4,195	3,725	470	11.2
Hillsborough	21,837	20,400	1,437	6.6
Merrimack	5,974	5,539	435	7.3
Rockingham	16,859	15,715	1,144	6.8
Strafford	5.709	4,903	806	14.1
Sullivan	2,401	2,137	264	11.0
Balance of State	45,158	40,703	4,455	9.9

Some of the possible causes for the unemployment rates on the above chart are: the lack of educational levels required, lack of employable skills and experience and little know-how in the details of job search or preparation for job interviews. Assistance is also needed in determining the labor market situations by industry and area together with being furnished information concerning prevailing wage rate and job requirements. There is a tendency on the part of the youth group to leave and re-enter the labor force more often than the older age groups.

New Hampshire having a greater percentage of rural environment than many other states, has transportation and geographic problems which are accentuated, especially in the northern counties.

Glossary

Annual Average The aggregate of 12 months data divided by 12. Annual average data are commonly used for projections and other long-term analyses.

Applicant A person who contacts a local office of the Department of Employment Security to seek employment or obtain employability development services.

Average Hourly Earnings Average weekly earnings divided by average weekly hours.

Average Weekly Earnings Average total money earnings of production or non-supervisory workers in the survey week, including overtime and incentive pay.

Average Weekly Hours Average total hours worked by production and nonsupervisory workers in the survey week, including overtime, paid vacation and sick leave.

Balance of State New Hampshire Minus Hillsborough County

Benchmark Most economic time series utilize a sample trend made of the best available data at the time. Periodically the series are adjusted due to more complete information being available. This periodic adjustment is a Benchmark Revision and the point-in-time for which the more complete data was available is the Benchmark Date. Data is commonly referenced by their benchmark data, e.g., "data based on a March 1976, benchmark."

Civilian Labor Force See Labor Force.

Consumer Price Index (CPI) this index is a measure of the average change in prices over time in a fixed market basket of goods and services. Effective with the January 1978 index, the Bureau of Labor Statistics began publishing CPI's for two population groups: (1) a new CPI for All Urban Consumers (CPI-U) which covers approximately 80 percent of the total noninstitutional civilian population; and (2) a revised CPI for Urban Wage Earners and Clerical Workers (CPI-W) which represents about half the pupulation covered by the CPI-U. The CPI is based on prices of food, clothing, shelter and fuels, transportation fares, charges for doctors' and dentists' services, drugs, and other goods and services that people buy for day to day living.

Covered Employment Employment in an industry that falls under the coverage of the respective states' unemployment insurance program. In most states presently only agriculture, the self-employed, some employed students, religious organizations, full commissioned salesmen and elected and appointed officials have significant numbers of noncovered workers.

Current Employment Statistics (CES) Estimates of nonagricultural wage and salary employment and production worker hours and earnings by industry. ES produces these estimates monthly for each state and SMSA from a sample of employing establishments in cooperation with the Bureau of Labor Statistics.

Current Population Survey (CPS) A monthly household survey of the population of the United States. This survey is the data source for the national estimates of labor force composition. Some CPS data is also incorporated into the state and area labor force estimating procedures to improve interstate comparability.

Definitions (1) Manchester LMA - City of Manchester and the towns of Auburn, Bedford, Candia, Chester, Derry, Goffstown, Hooksett, Londonderry, New Boston, Raymond and Weare.

(2) Nashua LMA - City of Nashua and the towns of Amherst, Brookline, Greenville, Hollis, Hudson, Litchfield, Lyndeboro, Mason, Merrimack, Milford, Mont Vernon, New Ipswich, Pelham, Temple and Wilton.

(3) N.H. Portion - Lawrence-Haverhill SMSA - Atkirson, Hampstead, Kingston, Newton, Plaistow, Salem and Windham.

Note: LMA Represents Labor Market Area and SMSA Represents Standard Metropolitan Statistical Area.

Discouraged Worker Persons who want work but made no attempt to find work in the past 4 weeks because of a belief that they could not find employment. Discouraged workers are not counted among the unemployed.

DOT Codes An occupational coding structure based upon job traits and relationships. The codes are published in the Dictionary of Occupational Titles.

Economically Disadvantaged An individual whose immediate family either receives cash welfare payments or whose annual income falls below the current Poverty Income Guidelines.

Educational Attainment Highest grade of school completed.

Employment by Place of Residence An estimate of the number of persons employed who live within a given labor market or other geographic area. All persons who worked for pay and unpaid family workers who worked at least 15 hours or more in the survey week are included, as are workers who were temporarily absent from their job due to vacations, labor disputes, etc.

Employment by Place of Work An estimate of the number of jobs filled in the survey week within a given area. Multiple job holders are counted for each job. In most states only the nonagricultural wage and salary workers are tallied by place of work. Labor disputants are not included in the estimates of employment by place of work.

Employment Security Automated Reporting System (ESARS) A computerized tally of all Job Service activities, job applicant and job openings characteristics.

Entry Level Job A beginning job that requires little or no experience, but may require a minimum amount of training or education for a specific position.

Hard-to-Fill Job Openings Job openings which have gone unfilled for a month or more. Some of the openings may be difficult to fill because of the job environment, wage scales or lack of qualified workers.

Hard-to-Place Applicant An applicant who is unable to be placed in a job due to (1) a lack of demand or (2) a lack of qualifications for a particular job.

High Demand Occupation Occupations which have a substantial number of job openings both in absolute terms and relative to the number of job applicants for that occupation. High demand may be the result of either high growth, high turnover and sometimes by a combination of the two.

Hispanic A person of Mexican, Puerto Rican, Cuban, Central or South America, or other Spanish culture or origin regardless of race.

Index or Index Number A measure of relative growth compared with a base figure of the same time series. In index form the base period is set equal to 100, and data for other periods are expressed as percentages of the base value. Plural is indices.

Insured Unemployment A count of persons who have filed claims for state unemployment insurance benefits.

Insured Unemployment Rate An administrative tool which is the ratio of insured unemployment to covered employment lagged about 6-9 months.

Job Bank A computerized system which provides rapid dissemination of job orders throughout a network of Employment Division local offices.

Job Corps A national system of 60 residential centers in 31 states and Puerto Rico providing basic education, vocational training, counseling, health care, and other services to help disadvantaged young men and women, age 16 through 21, prepare for jobs and responsible citizenship.

Job Training Partnership Act (J+PA) an act which replaces the Comprehensive Employment and Training Act, effective 10/1/83. This act provides a new program and delivery system to train economically disadvantage persons and others for permanent private sector employment. The training programs will be administered by the State and planned and carried out through a partnership between the private sector and government at the local level. Programs include adult and youth training, training and placement assistance for dislocated workers and federal administered activities including programs for Native Americans, migrant and seasonal farm workers, veterans, labor market information, job Corps., and other national activities.

Labor Force All persons 16 years and older who are either employed or unemployed. Normally published as a civilian labor force by place of residence (See Employment by Residence).

Labor Market Area An area with a central community and economic concentration in which workers can generally change jobs without changing their residence. In most states labor market areas are either counties or groups of counties.

Labor Market Information(LMI) Data on a broad range of topics such as labor force, employment by industry, and occupation, unemployment, population, earnings, wages, hours worked, training programs and labor turnover.

Labor Turnover Movement of workers in and out of employment in a given time period in an industry, occupation or firm.

Medical Experience Directed Into Health Careers (MEDIHC) A program assisting veterans who want to pursue a health career in civilian life. Any veteran seeking a civilian health career or employer seeking qualified personnel in the health field may contact the Veteran's Representative at the nearest state Employment Service Office.

Metropolitan Statistical Area(MSA) Except in the New England States, MSAs consist of counties or groups of contiguous counties which meet specifications of social and economic integration with a central city of at least 50,000 population, or an urbanized area of at least 50,000, and a total metropolitan area population of at least 100,000. In New England States, MSAs consist of towns or cities rather than counties.

Minority Group All races other than white, and the Spanish-American ethnic group.

Multiple Job Holders Persons who simultaneously work more than one job.

Nonagricultural Wage and Salary Employment Place of work employment that does not include the selfemployed, unpaid family workers, domestics or agricultural workers. Conceptually this is probably the most consistent economic time series available to compare different labor markets over an extended period of time.

Non White Group All persons who identified themselves as Negro, American Indian, Chinese, Japanese, Filipino, Korean, or other races in response to survey or census questions.

Occupational Employment Statistics (OES) A program which produces occupational data for major industries once every three years. Projections by occupation are made which aid educators and other occupational planners.

Part-time Work Work that is less than 35 hours per week.

Per Capita Income Total personal income divided by total popluation.

Personal Income, Total Private and government wage and salary payments in cash and in kind, other labor income, farm and nonfarm proprietors' income, interest, net rents, dividends and transfer payments, less personal contributions for social insurance. It is measured before the deduction of personal income and other personal taxes. Dollars are not adjusted for change in consumer price index.

Qualified Applicant An applicant who meets education, experience, and performance standards for a job opening. These standards are set by the employer.

Seasonal Adjustments Minimizes the changes in any time series from normal annual occurrences, such as Christmas, summer vacations and weather. After seasonal adjustment any month can be compared with the annual average, or any other month and differences should then be due to economic trends or unusual occurrences. Seasonally adjusted data more accurately portrays underlying economic trends, but should not be used where the current level is more important to the data user than the economic trend. No meaningful seasonal adjustment exists for annual or annual average data since the purpose is to make monthly or quarterly data comparable to the annual average data.

SIC Codes Standard Industrial Classification code structure in which all establishments are classified by a four-digit code according to their primary economic activity. Frequently references will be made to SIC codes at the 1, 2, or 3 digit levels when a less specific classification is useful.

Survey Week The week that includes the 12th of the month is used as a reference period for most labor force data.

Time Series A set of consistent economic quantitative data collected at periodic intervals (most labor market information is monthly, but weekly and annual data is published for some items).

Total Employment A count of persons, residing in an area, who worked for pay or profit during the reference week including the 12th of the month or had a job from which they were temporarily absent because of illness, vacation, labor dispute, or other reasons not reflecting a shortage of work, or who worked 15 hours or more as unpaid workers in an enterprise operated by a member of the family.

Total Unemployment A count of persons, residing in an area, who did no work at all during the reference week including the 12th of the month, but were seeking work or awaiting recall from layoffs or the beginning of a new job within the next 30 days. This count includes persons receiving unemployment insurance benefits, those who have delayed filing for benefits but were not eligible to receive them, those unemployed who have applied for benefits but were not eligible to receive them, unemployed workers who exhausted benefits in the current benefit year, unemployed workers from industries not covered by unemployed insurance, and unemployed persons newly entering or reentering the labor force.

Types of Unemployment

Frictional - Unemployment that is frictional in nature i.e., short-term unemployment encountered in searching for a job, or from a temporary layoff.

Structural - Unemployment that is structural in nature i.e., a mis-match between the skill requirements or existing job openings and the skills possessed by the current unemployed.

Cyclical - Unemployment that is cyclical in nature i.e., deficiencies in aggregate demand exist resulting in a level of labor demand that falls short of the available supply of workers.

Underemployment A term that includes both persons who are working part-time who would prefer full-time work, and persons working full-time in an occupation which does not utilize their skills derived from prior training or experience.

Unemployment Persons who were not employed during the monthly survey week but were available for work and had either (1) overtly engaged in a job-seeking activity within the four week period up to and including the survey week; (2) Were waiting to be recalled from a layoff; or (3) were waiting to report to a new wage and salary job within 30 days.

Unemployment Rate The number of unemployed persons expressed as a percentage of the labor force. Commonly the seasonally adjusted unemployment rate referred to as the unemployment rate and it is usually the only rate quoted in the monthly news release on the U.S. unemployment situation (see Seasonal Adjustment).

Vietnam Era Veteran (VEV) Any person who served on active duty for a period of more than 180 days, any part of which occurred between August 5, 1964, and May 7, 1975, and was discharged or released with other than a dishonorable discharge; or was discharged or released from active duty for a service-connected disability if any part of such duty was performed between these dates.

Work Incentive Program (WIN) Counseling, training, job development and supportive services are provided to employable recipients of Aid-to-Families-with-Dependent-Children (AFDC). The object is to place AFDC recipients into suitable employment.
